

ABSTRACT OF THE DISCLOSURE

The invention relates to a method of displaying unknown-word(s) such that an electronic apparatus, such as a computer or PDA displays unknown-word(s) of a digital article. The present
5 invention uses a vocabulary database to find unknown word(s) of said digital article and marks found unknown word(s) and/or displays found unknown word(s) together as an unknown-vocabulary area so that a reader knows where unknown word(s) are in said digital article. In addition, the present invention
10 provides a method to allow a user to change a known word to an unknown word in said digital article and vice versa, so that the vocabulary database is updated and becomes more accurate
